### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The limitation of having a first set of operation codes (opcodes) for accessing a lower section of memory, and having a second set of operation codes, which are different from the first set of operation codes for accessing the extended memory area, in combination with the forcing of the extended address portion to zero of an instruction in the first group accessing the extended memory area, forcing it to access the lower memory area instead, has not been found in any prior art. While art exists which can force instructions to access certain parts of memory at different times, the Examiner has not found any art which does this filtering as a result of the opcode itself, but rather in the prior art, the filtering is done by using a flag set during execution, regardless of the opcode being executed, which makes the claimed invention distinct from the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
